

The New Millennium Research Council (NMRC) invites you to attend

The release of a new NMRC report authored by Bob Litan:

**GREAT EXPECTATIONS:
POTENTIAL ECONOMIC BENEFITS FROM
ACCELERATED BROADBAND DEPLOYMENT TO OLDER
AMERICANS AND AMERICANS WITH DISABILITIES**

December 8, 2005

**12pm – 2pm
Lunch will be served**

**The Mayflower Hotel
Chinese Room
1127 Connecticut Avenue NW
Washington, DC 20036**

This first-of-its-kind report by Bob Litan, noted Kauffman Foundation and Brookings Institution scholar, is a breakthrough examination of the economic benefits to the nation that can be derived from accelerated broadband deployment to older Americans and people with disabilities. Broadband can deliver unparalleled opportunities in health care, employment, and independent living for these important and growing sub-groups of the U.S. population. Litan's work estimates the tremendous cost savings and output expansion resulting from the use of broadband technologies for services such as telemedicine and telework. The report's unique findings will be of major importance to the Administration and Congress, older Americans, people with disabilities, economists, financial analysts, and other interested parties. Litan will present his groundbreaking findings at the luncheon and discuss how these potential benefits make accelerating broadband deployment a national priority.

Seating is limited, so please RSVP as soon as possible.

For questions or to RSVP by phone, please call Nia Edwards at 202-263-2932
